Subject: Public Comment Period for the Draft Boatyard General Permit and Fact Sheet

Hello,

As joint Stewards with Ecology, the Department of Natural Resources (DNR) appreciates the opportunity to review and comment on draft changes to the Boatyard General Permit. After our review, DNR did not find anything in the updates to the permit that we felt warranted a formal comment.

However, DNR would like Ecology to more diligent in requiring DMR data to be submitted and available through their permitting database.

We thank you for all your work and look forward to the continued collaboration and work with Ecology as we protect our State's Natural Resources.

Sincerely,

Heather
